

How to Recycle #5 Plastics

Through the Gimme 5 program, offered by Preserve Products, individuals can recycle #5 plastics like yogurt cups, hummus tubs and other food containers.

Products packaged in #5 plastic are sold widely, but #5 is not recycled in most communities. By recycling your #5 plastic through the Gimme 5 program, you are saving plastic from being sent to landfills, keeping the plastic local by recycling it here in the USA, and you are powering Preserve by helping us transform your recyclables into new Preserve products.

To participate, you must mail your #5 plastics to Gimme 5. Click [here](#) for the shipping address and to learn more.
